## SUMMARY

I'm a motivated Computer Science student with a passion for technology, teamwork, and impactful project execution. I've led multiple academic and real-time projects, combining technical knowledge with strong communication and management skills. I enjoy taking initiative, adapting to challenges, and turning ideas into meaningful outcomes. Currently leading a team for an IIT Bombay internship project to deliver practical solutions.

## WORK EXPERIENCE

<b>Student Ambassador (DYP CET)</b>	<b>Jan 2024-25</b>
• Represented the college for academic and extracurricular excellence. Encouraged student participation and bridged communication between faculty and students.	
<b>Management at Prarambh Development Cell (DYP CET)</b>	<b>June 2024-Present</b>
• Led a student team to deliver a real-time project for a medical college. Coordinated directly with stakeholders and ensured timely, requirement-based development.	
<b>Student Council (DYP CET)</b>	<b>June 2025-Present</b>
• Organized cultural events and served as a link between students and administration for college-level programs and fests	

## PROJECT

<b>Salary Management System</b>
• Built a dual-role system for administrators and employees
• Admin Features: Add/remove employees, track attendance, calculate salary, provide feedback, approve registrations
• Employee Features: View/update profile, change password, access salary records and feedback
<b>E Learning Hub</b>
• Developed an interactive platform to enhance student learning
• Created structured course modules to improve engagement and learning outcomes
<b>Project Coordinator: Medical College</b>
• Managed meeting and coordinated with the medical college for feedback and requirements.
• Ensured smooth communication to align project development with their needs..
